

Final conference of the TRUST2COARA Project

December 2nd - 2025
Tunis

Overview and Goals :

The TRUST2COARA Final Conference brings together researchers and stakeholders to present and discuss main results and propositions of the project in innovation in research evaluation practices to promote fairness, inclusivity, and transparency, enhancing the quality and impact of scientific research. This Project, supported by the Coalition for Advancing Research Assessment (CoARA), is a collaborative initiative by the University of Carthage (UCAR) and the Institute for Bioengineering of Catalonia (IBEC) in Barcelona. The Doctoral School at INSAT served as a model for testing these reforms within UCAR's framework. The participants will discuss criteria such as societal and environmental impacts of research, multidisciplinary and dissemination of research findings to achieve a balance between traditional quantitative metrics and qualitative aspects.
